

Platinum Edition: TruckSide Down Draft Paint Booth is the best choice for those who aren't able to install a pit. When reaching the floor, the air is exhausted out through the sides of the booth. Standard Paint Booth Package Booths are equipped with high quality components. Our booths comply with NFPA-33, the top-level safety code in the USA for spray application of flammable or combustible materials. These models have been tested and certified as an ETL-Certified Booth by Intertek/ETL (Edison Testing Labs), and OSHA (Occupational Safety & Health Administration) recognized NRTL (Nationally Recognized Testing Laboratory). This certification is mandatory by many local authorities for safe operation and compliance. ETL listing included with your order

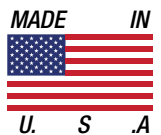

AIR FLOW

Side downdraft paint booths are similar to downdraft booths in terms of their ability to capture overspray, but they don't require a floor pit because they exhaust air through the side walls. This makes them a cost-effective option for businesses with limited space.

**CONFORMS TO
NFPA STD 33
CERTIFIED TO
CSASTD C22.1**

Standard Features:

- Air tight 18 gauge galvanized steel construction
- 15' H x 11' W entrance doors
